

Congressman Rob Wittman Congratulates MTCSC, Inc.

Congressman Rob Wittman visits MTCSC at their Stafford, VA facility and congratulates them on successfully creating more job availability in Stafford County

Stafford, Virginia August 2, 2010 – MTCSC, Inc. hosted Congressman Rob Wittman at their Stafford, VA location. Congressman Rob Wittman’s interest in MTCSC was sparked by the two facilities developed and constructed by MTCSC over the past 8 years. MTCSC showed their support for Congressman Wittman by providing a tour of the Integrated Teams Solutions Facility (ITSFAC®) and the Center for Technology (C4T™). One of Congressman Wittman’s goals is to find ways to encourage job creation and promote economic growth within his district. Congressman Wittman congratulated MTCSC on their ability to successfully create more job availability in Stafford County. With the success of MTCSC, Congressman Wittman hopes in the near future, people in the Stafford community will no longer need to commute long distances for work, due to more job availability in the surrounding areas.

MTCSC promoted job availability by constructing facilities in Stafford that bring more work to the area. MTCSC Vice President of Technical Solutions, John Roehl, encourages the philosophy of, “if you build it, they will come.” When MTCSC completed construction on the ITSFAC in 2002, they won a prime contract award with the Marine Corps Systems Command. In addition to bringing more business into Stafford County, MTCSC created a plethora of new jobs that needed to be filled. This same reaction occurred when MTCSC constructed the C4T in 2008.

Greg Trevarthen, MTCSC’s Vice President of Programs says, “Congressman Wittman is a friend to the Armed Forces, the United States Marine Corps and those Industry Partners who serve and support them.” To show their appreciation, MTCSC presented Congressman Wittman with an ITSFAC coin, a prestigious MTCSC award saved for special members of the community, and a Tun Tavern mug.

Congressman Wittman’s goal for economic growth in Stafford County is being fulfilled by MTCSC. MTCSC has no intentions of slowing down their growth. MTCSC continues to upgrade their facilities and capabilities to meet the needs of their current customers and attract new customers as well. In addition, MTCSC is in the developmental phase of creating a Cyber Range Facility to protect against threats to our homeland.

MTCSC’s customer-centric focus has allowed for the creation of new facilities, new business partners, and more job availability in the greater Stafford County area. Congressman Wittman congratulates MTCSC on their promotion of economic growth.

For additional information on Congressman Rob Wittman’s visit to MTCSC, please contact Jim Pierce, MTCSC’s Vice President of Business Development at 703.221.7400 or jpierce@mtcsc.com.

About MTCSC, Inc.:

MTCSC was founded in 1997 by David B. Camarata. In 2002, MTCSC opened the Integrated Team Solutions Facility (ITSFAC®) in Stafford to meet the need for a large-scale integration facility proximate to one of the company’s primary clients, Marine Corps System Command. In 2007, MTCSC opened a new 33,000 square foot facility in Quantico Corporate Center that consolidated East Coast corporate

operations previously scattered among many locations within Stafford. MTCSC's customer-focused, high-technology engineering approach has resulted in explosive corporate growth. For the past four consecutive years, MTCSC has been recognized as one of the "100 Fastest-Growing" privately held companies in San Diego, CA with the most significant growth being in Stafford, Virginia. In 2008, Mr. Camarata was an Ernst & Young San Diego Entrepreneur of the Year Finalist.
